Professional Summary

Motivated B.Tech student with strong interest in software development and problem solving. Experienced in C++ and Python with focus on Data Structures and Algorithms. Actively solving coding problems and building projects to improve programming skills.

Education

Bachelor of Technology (B.Tech) – Dr. A.P.J. Abdul Kalam Technical University (AKTU) (Expected Graduation: 2028)

Technical Skills

Programming Languages	C++, Python
Computer Science Fundamentals	Data Structures and Algorithms
Tools & Platforms	Git, GitHub
Other Skills	Problem Solving, Algorithmic Thinking

Projects

Jarvis Voice Assistant | Python

- Developed a voice-controlled assistant using speech recognition and text-to-speech technologies.
- Recognizes voice commands and performs tasks such as opening websites and responding to queries.
- Implemented using Python libraries for automation and voice processing.

Coding Profiles

LeetCode – Regularly solving data structures and algorithms problems to improve coding efficiency.

GitHub – Uploading and maintaining programming projects and code implementations.

Interests

Software Development, Artificial Intelligence, Competitive Programming
